THE DONALD W. CHALLINOR MEMORIAL SCHOLARSHIP FOUNDATION

SCHOLARSHIPS IN MARINE ENGINEERING AND NAVAL ARCHITECTURE

A scholarship foundation for students pursuing careers in marine engineering or naval architecture has been created by Mrs. Nancy Challinor in memory of her late husband, Donald W. Challinor, noted marine engineer and shipyard executive.

Scholarships are awarded by the Foundation's Trustees, which include executives of the Society of Naval Architects and Marine Engineers, the Canadian Institute of Marine Engineering and the Shipbuilding Association of Canada. At least three scholarships may be awarded annually, and it is intended to reserve one for each of: Western Canada (British Columbia and the Prairie Provinces & Territories); Central Canada (Ontario and Quebec); and the Atlantic Provinces, provided eligible applications are received from each region.

Scholarships will be awarded to graduates of the penultimate year (i.e. 3rd year of a 4-year program, or 2nd year of a 3-year program, etc.) of courses in naval architecture or marine engineering, as described herein.

Applications will be judged on the basis of:

- Penultimate year marks in engineering and science subjects;
- Motivation to a career in marine technology;
- Character.

To be eligible for scholarship award, a student applying must:

1. Be at least 18 years of age, and
2. Be a Canadian citizen, and have been for at least three years prior to application, and
3. Be resident in Canada, and
4. Have satisfactorily completed, or received credits at a recognized Canadian university, community college or marine institute for all but the final year in a program leading to recognized qualifications in naval architecture or marine engineering. (i.e. degree, diploma, D.O.T. certification).

The value of scholarships and the number to be awarded each year will be determined by the trustees. The total value available is dependent upon the Foundation's net earnings each year.

**Applications should be submitted by May 31, 2008
in accordance with the attached Application Instructions.**

Application Instructions

Applicants must include the following information in support of their applications:

1. Full name, mailing address and contact information for the next 3 months.
2. Date of birth.
3. Proof of citizenship and Canadian residency.
4. Copies of most recent achievements in engineering and science subjects.
5. Brief history of previous education.
6. Description of applicant's career objectives and areas of interest in marine technology (i.e. marine engineering, naval architecture).
7. University, community college, or marine institute to which application has been filed for the coming year.
8. Letters of reference from three persons, at least one being from the Canadian marine industry, and a least one from academic sources.
9. A list of any other scholarships being received or expected in the coming year.
10. Social Insurance Number.

Applications should be typewritten and submitted to:
